Remarks for Datapak Circuit Switched Service:

- ISDN2 Network Terminal is provided to HKT's ISDN2 subscribers only and its installation will be carried out together with that of the ISDN2 U-interface.
- Charge duration is measured in units of minutes for each 64K bearer channel connection (for local voice and data calls).
- Up to 8 sockets can be installed on a Datapak ISDN2 Network Terminal. The basic installation charge includes the one-off installation of one socket.
- For each socket added subsequently, one-off installation charge of HK\$ 875.00 for each up to a maximum of 8 sockets.
- For Datapak ISDN2 U-interface, only 1 socket will be installed to customers.

### 3.4 Options

Dual Link (Note 3 & 4)	1,100.0	2,007.0	2,007.0	3,012.0
Site Backup for speed ≤4.8Kbps	3,000.0	4,266.0	4,266.0	1,487.0
Site Backup for speed 9.6Kbps to 19.2Kbps	4,300.0	4,266.0	4,266.0	1,487.0

### Other Charges for Datapak Digital Data Service:

- For speed upgrade within the same service category, the upgrade charge is same as the internal relocation charge of the new service or the difference of the connection charge between the two services whichever is higher.
- For both speed upgrade and internal relocation carried out at the same time, the standard internal relocation charge will not be waived. (Internal Relocation should be carried out before service upgrade)
- For both speed upgrade and external relocation carried out at the same time, only the standard external relocation charge will be charged.
- For speed downgrade within the same service category, the downgrade charge is same as the standard connection charge of the new service.
- For service category change, the charge is same as the standard connection tariff of the new service. (DDS divided into three categories: (i) Dataline, (ii) Mainline/Branchline & (iii) Broadcast).
- Change to Dual Link—standard connection charge of Dual Link.
- The channel configuration charge of Channelised T1, T1/16 & T1/64 is equivalent to the internal relocation charge, and that for T1/16 & T1/64 is \$1487 per channel on the mainline.

### Notes for Datapak Digital Data Service:

- The price shown is for first time installation irrespective of number of ports. If subsequent ports are added, the connection charge for each additional 4 ports is \$4,266.
- The price shown is for a basic configuration comprising 8 ports (T1/16 and T1/64). For each additional 4 ports, monthly rental is \$1,836
- It supports services with speed between 2.4Kbps and 64Kbps except connections in remote area.
- The charges are additional to Datapak DDS access charges.
- The price shown is for each 'package' of Dataline 96 (Dual). A package means two access circuits which are installed at the same location.

- Additional Interface	5,000.0	7,400.0 (per location)	4,400.0

Remarks for Datapak Fiberline Service:

- a) The above charges are on a per end basis at a distance within 20km between two (2) customer locations. 1.2 x monthly rental is required for additional 10km in distance.
- b) The above charges do not include the cost of internal trunking, premises access and sundry; and the costs of additional fibre provision, if there is no fibre coverage.
- c) The Customer is required to facilitate the Company to provide the service to the installation premise.

- d) In general, the delivery is 8 weeks upon order confirmation which does not include Building Management Office (“BMO”) permit application and customer internal facilities. It is subject to the provision feasibility of the installation locations.
- e) For port upgrade, new ports which support higher bandwidth will be installed to replace the original one, whereas the difference of the installation charges have to be paid.
- f) Additional Pricing Information:

For Ethernet Private Line: Reconfiguration (charge per end) for 10 – 100Mbps ports is \$1,000 and normally takes 5 days.

For all Fiberline services: CNMS Traffic report (HK\$500 per month per end).

Notes for Datapak Fiberline Service:

- For Fiberline DWDM/CWDM, the charge is per location.
- For upgrade from in-service existing Fibreline OC3c / ESCON / FE / FDDI / Couplings services, one-off installation charge will be waived if the Service remains at the same original location after the upgrade.

- 2nd & Subsequent service

Remarks for Datapak VideoLink Service:

- a) Definition on 1st, 2nd & subsequent services:  
Price on “1st service” applies to both A and B ends when there is first VideoLink installed between A and B addresses.
- When there is a second and more VideoLinks installed between the same A and B addresses as the first one, then tariff on “2nd & subsequent services” is applied to both A and B ends associated with the second and subsequent VideoLinks.
- In other situations such that there are VideoLinks installed between A and another address other than B, tariff on “1st service” applies to both ends.
- b) If mixed services are required, the VideoLink with the highest tariff will be taken as the first service.
- c) The transmission direction of additional audio channels associated with a one-way VideoLink must follow that of the video channel.
- d) Charges exclude the cost of any applicable Government licence.
